

Reading assignment #5 for METR6623
11 Nov. 2010

Emanuel's text, Secs. 9.2.1, 9.2.2, 11.5, and 11.6, pp. 243 – 257 and 372 – 387.

Multicell convection and storm classification

Browning, K. A., 1977: The structure and mechanism of hailstorms. *Hail: A Review of Hail Science and Hail Suppression*, Meteor. Monogr. **16**, Amer. Meteor. Soc., 1 – 43.

Browning, K. A., J. C. Fankhauser, J.-P. Chalon, P. J. Eccles, R. G. Strauch, F. H. Merrem, D. J. Musil, E. L. May, and W. R. Sand, 1976: Structure of an evolving hailstorm, Part V: Synthesis and implications for hail growth and hail suppression. *Mon. Wea. Rev.*, **104**, 603 – 610.

Chisholm, A. J., and J. H. Renick, 1972: The kinematics of multicell and supercell Alberta hailstorms. Alberta Hail Studies, Rep. 72-2, Edmonton, Alta., Canada, 24 – 31.

Droegemeier, K. K., and R. B. Wilhelmson, 1985a: Three-dimensional numerical modeling of convection produced by interacting thunderstorm outflows. Part I: Control simulation and low-level moisture variations. *J. Atmos. Sci.*, **42**, 2381 - 2403.

Droegemeier, K. K., and R. B. Wilhelmson, 1985b: Three-dimensional numerical modeling of convection produced by interacting thunderstorm outflows. Part II: Variations in vertical wind shear. *J. Atmos. Sci.*, **42**, 2404 – 2414.

Fankhauser, J. C., and C. G. Mohr, 1977: Some correlations between various sounding parameters and hailstorm characteristics in northeast Colorado. Preprints, 10th Conf. on Severe Local Storms, Omaha, NE, Amer. Meteor. Soc., 218 – 225.

Foote, G. B., and H. W. Frank, 1983: Case study of a hailstorm in Colorado. Part III: Airflow from triple-Doppler measurements. *J. Atmos. Sci.*, **40**, 686 – 707.

Fovell, R. G., and P. S. Dailey, 1995: The temporal behavior of numerically simulated multicell-type storms. Part I: Modes of behavior. *J. Atmos. Sci.*, **52**, 2073 – 2095.

Fovell, R. G., G. L. Mullendore, and S. – H. Kim, 2006: Discrete propagation in numerically simulated nocturnal squall lines. *Mon. Wea. Rev.*, **134**, 3735 – 3752.

Fovell, R. G., and Y. Ogura, 1989: Effect of vertical wind shear on numerically simulated multicell storm structure. *J. Atmos. Sci.*, **46**, 3144 – 3176.

Fovell, R. G., and P. – H. Tan, 1998: The temporal behavior of numerically simulated multicell-type storms. Part II: The convective cell life cycle and cell regeneration. *Mon. Wea. Rev.*, **126**, 551 – 577.

Marwitz, J. D., 1972a: The structure and motion of severe hailstorms. Part I: Supercell storms. *J. Appl. Meteor.*, **11**, 166 – 179.

Marwitz, J. D., 1972b: The structure and motion of severe hailstorms. Part II: Multicell storms. *J. Appl. Meteor.*, **11**, 180 – 188.

Marwitz, J. D., 1972c: The structure and motion of severe hailstorms. Part I: Severely sheared storms. *J. Appl. Meteor.*, **11**, 189 – 201.

Newton, C. W., 1950: Structure and mechanism of the prefrontal squall line. *J. Meteor.*, **7**, 210 – 222.

Peterson, R. E., 1984: A triple-Doppler radar analysis of a discretely propagating multicell convective storm. *J. Atmos. Sci.*, **41**, 2973 – 2990.

Rotunno, R., J. B. Klemp, and M. L. Weisman, 1988: A theory for strong, long-lived squall lines. *J. Atmos. Sci.*, **45**, 463 – 485.

Thorpe, A. J., M. J. Miller, and M. W. Moncrieff, 1982: Two-dimensional convection in non-constant shear: A model of mid-latitude squall lines. *Q. J. Royal Meteor. Soc.*, **108**, 739 – 762.

Weisman, M. L., and J. B. Klemp, 1986: Characteristics of isolated convective storms. *Mesoscale Meteorology and Forecasting*, P. S. Ray, ed., Amer. Meteor. Soc., 331 – 358.

Weisman, M. L., and R. Rotunno, 2004: “A theory for strong-lived squall lines” revisited. *J. Atmos. Sci.*, **61**, 361 – 382.
