

# **METR 4133, Atmospheric Dynamics III: Mid-Latitude Synoptic-Scale Dynamics**

**Fall 2012**

## **Class policy**

Dr. Xuguang Wang  
Office: National Weather Center, Room 5341 (325-3426)  
Email: xuguang.wang@ou.edu

### **For homework problems:**

Homework is due in class on the day they are due. Late homework is not accepted unless you have documented medical emergency.

You are encouraged to discuss homework problems with one another, but do not copy from someone else's work. Solutions submitted under your name must express your own descriptions and calculations and be written by you.

Problem set solutions should be detailed, explicit and logical.

Illegible homework gets a grade of 0. The grader decides what's illegible.

### **For Reading assignments:**

Reading assignments will be provided during the lecture.

### **For exams:**

No make-up exams will be given unless under exceptional circumstances such as medical emergency.

Exams are closed book.

No calculators are allowed in exams.

### **For class notes:**

I will make heavy use of the blackboard. Take good and complete notes in class.
